Hi Rachel - is this what you're looking for? This is the email I sent Versar with the summary tables you guys put together. Versar then reworded and sent along to the peer reviewers.

Just let me know if you're looking for something else.

Planes were fine, now happily in Anchorage debating how tomorrow is going to go!

**Subject:** additional public comment files for reviewers

Hi all,

Attached are the additional files mentioned in yesterday's public comment summary for the reviewers. These files, and the associated FTP site, are intended to give the reviewers a bit more detailed information on the public comments received, and to make it easier for them to access any public comments they're interested in reading. Please stress to the reviewers that they are not required to look at all of these comments - we're just trying to make it as easy as possible for them to find comments they would like to read. Also, all of these comments are already publically available on [regulations.gov](http://regulations.gov) - we're just trying to simplify access for the reviewers.

The pdfs included here are:

- (1) FTP Instructions - tells the reviewers how to access the FTP site, which contains the actual text of the approximately 5,500 unique public comments received.
- (2) Table of Speakers from Public Meetings - lists all of the speakers at public meetings held in June; transcripts of these meetings are available on the FTP site.
- (3) Table of Mass Mailing Campaigns - lists the mass mailing campaigns, organizations responsible, and number of letters received in each campaign.
- (4) Table of Comments by Organization - lists all comments, sorted alphabetically by organization (when provided)
- (5) Table of All Comments - lists all comments received, sorted alphabetically.

Each entry in Tables (3) through (5) includes a document number, which can be used to find the actual text of the comment on the FTP site (see the FTP instructions file).

Also, the updated public comment statistics are as follows (1st paragraph of the Overview of Public Comments section of the summary, updated as of 8/3):

The EPA received over 230,000 public comment letters on the draft Assessment. This total includes approximately 5,500 unique letters and approximately 226,000 letters from twenty-five different mass mailing campaigns. Twenty of these mass mailing campaigns, generating approximately 216,000 letters, expressed support for the Assessment and/or EPA action. Five campaigns, generating approximately 9,000 letters, were not supportive of the Assessment and/or EPA action. The remaining mass mailer, signed by 318 people, requested a comment period extension.

Versar - please read through this email, make sure it makes sense, and let me know if you have any questions. This just needs to get to the reviewers by sometime tomorrow afternoon - so I want to be sure it's explained clearly enough before it goes out to them.

Thanks! Kate
